

# Bartlett & West

**Driving community and industry forward, together.**

As a long-standing member of FCDC, Bartlett & West has grown over the years to become a full-service planning, civil, structural and MEP engineering, architecture and construction provider to the Franklin County area. They serve a variety of clients including municipalities, industrial, economic and commercial developers, utilities, universities and private entities. Bartlett & West's staff connect all the pieces so you can design and build smarter projects from the ground up. Highlights of the company's work in Franklin County includes:

## **KALMAR TEST TRACK**

Bartlett & West worked with Kalmar to design and construct a test track for the Terminal Tractors that are built at the Ottawa facility. The continuous loop track includes a separate, steep grade ramp to test braking and pulling power and a 200-linear-foot cobblestone area for noise vibration testing.

## **PROXIMITY PARK**

Bartlett & West worked with numerous entities within the community throughout the multi-year planning and development process for the new business park. During design, it was necessary to coordinate with multiple parties to keep the process moving forward in a streamlined fashion to stay on schedule. Engineers, planners, landscape architects and surveyors worked together with community leaders, additional wetland and geotechnical subconsultants along with City and County leadership to facilitate numerous areas of design.

## **OTTAWA STORMWATER IMPROVEMENTS**

The City of Ottawa contracted with Bartlett & West to provide storm sewer modeling, design and contract document for improvements in multiple residential areas. Bartlett & West performed analysis of the watersheds, designed storm sewer extensions and made recommendations for sizing and rehabilitations.

## **NEOSHO COUNTY COMMUNITY COLLEGE (NCCC)**

Bartlett & West worked with Neosho County Community College officials to develop a new 27-acre campus off Kansas Route 68 in Ottawa, Kansas. Bartlett & West provided civil engineering, landscape architecture, MEP engineering and structural engineering for the project.

In addition, the company has worked on many more Franklin County projects, including the Ottawa University (OU) Student Center, Library and Parking Lots, Eastgate Commercial Development, Legacy Park, Legacy Square, Ottawa City Hall and Law Enforcement Center, Ottawa Airport Hanger, Bob Allen-Advantage Ford, Kalmar Parts Warehouse Addition and Office Renovation, Central Fiber, Wellsville Retirement Community Phase 1 and 2, East Kansas Chemical and Pinnacle Ag Holdings.

Headquartered out of Topeka since 1951, Bartlett & West has 19 offices in eight states. The company is committed to “Driving community and industry forward, together.” Therefore, in addition to their project work, Bartlett & West is heavily committed to support the communities in which its employees work and live. In fact, staff members are active in the Ottawa Chamber, Friends of COF counties, NCCC, OU and of course FCDC, including volunteer board involvement. The company has also committed a five-year financial contribution to the Legacy Square.

To learn more about Bartlett & West and its commitment to service, visit [www.bartlettwest.com](http://www.bartlettwest.com). They are ready and able to assist with any building, drainage, electrical, road, site or water/wastewater need.
